HYDROCARBONS IN THE ERA OF NEW ENERGIES :

Stakes, Challenges and Prospects

GENERAL PRESENTATION

HYDROCARBONS, TODAY AND TOMOROW...

When the entire world becomes aware of climate change and mobilises to fight against it, hydrocarbons are the turning point because they generate a substantial quantity of greenhouse gas when they are used. They are therefore considered as the main issue to sort out whereas modern economy and today's life at large are greatly dependent on hydrocarbons or on their by-products.

So, the question is what should be done? How to tackle the ambivalence of petroleum and gas which are both source of development and motive of concern for the future of humanity?

Is it possible to control these fossil energies or make them environmental friendly so that they stick to the times? How can or should enterprises operating in this sector adjust? What has yet been known about new energies? Have they been studied enough so as to know possible limits, or even some of them but not yet revealed?

What legal industrial and commercial, socio-cultural or anthropological consequences would be linked to these upheavals? There are as many questions as possible that can be asked.

The 1st International Exhibition of Cameroon Petroleum and Gas give us the sole opportunity to tackle all these questions with the professionals, experts and researchers coming up with a common vision with regard to the issue.

Thus, the theme of exhibition is: "HYDROCARBONS IN THE ERA OF NEW ENERGIES: Stakes, Challenges and Prospects". A good climate of interactions, mutual enrichment and benchmark is granted to participants who are called on to show their know-how in the domain, to share their concerns, to enroll in a durable approach of their activity sector.

With the anointing of the government and its strong commitment in the sector, the NHC (National Hydrocarbons Corporation), together with the participation of experts coming from several countries in Europe, America, Africa and Asia, we know that this first International Exhibition of Cameroon Petroleum and Gas will never be forgotten.

A. ALINGA
CEO & Founder ENOILGAS

Thank you for joining us.

PROGRAMM OF SIPEG

Wednesday 1st June 2016

- The opening of exhibition by the MINMIDT
- Visit of stands
- Workshops, Seminar, Conferences
- Thematic dinners
- Press conference

Thursday 2nd June 2016

- Visit of stand
- Workshops, Seminar, Conferences
- Professional meetings
- Touristic activities
- Thematic dinners
- Press conference

Friday 3rd June 2016

- Visit of stand
- Workshops, Seminar, Conferences
- Professional meetings
- Touristic activities
- Thematic dinners
- Press conference

Saturday 4th June 2016

- Visit of stand
- Workshops, Seminar, Conferences
- Professional meetings
- Touristic activities
- Press conference
- End of activities and Gala Night

OBJECTIVES OF SIPEG

In order to boost the development of the energetic and mining sector launched by the Cameroonian Government and specialized international organizations, the liberalization of activities has enabled the development of multiform of partnerships and the necessity to share experience for common interests with the different stakeholders of the sector whose targeted main objectives are:

- Awareness of new energetic stakes in the world
- Development of specific training enabling technological mastery

ACTIVITIES OF SIPEG

TRADE FAIR :

Exhibition of different services, products and equipment in 250 stands; with live broadcast passages for enterprises in order to promote their image and services.

B2B MEETINGS :

Business appointments will be made by professionals, operators, consultants in order to strike up partnerships and fruitful interactions.

WORKSHOPS-SEMINAR AND CONFERENCES :

- 8 conferences will be chaired by experts in petroleum coming from different enterprises of the sector
- 24 Enterprise Workshops will be chaired by petroleum enterprises or providers of petroleum services
- 01 Seminar with certification at the end of Exhibition for professionals organized by an international enterprise

COMMUNICATION :

The communication pool of the Exhibition provides the participants with numerous communication tools on the event site and on national and international media

GALA NIGHT :

- Official closing of the exhibition
- Awards ceremony
- Cultural animation
- Closing dinner

THEMATIC DINNERS :

Opening of an expression and additional exhibition space for enterprises so as to boost their image, promote their products and the last innovations around a dinner-cocktail.
